

2017 CWEA ANNUAL CONFERENCE

Water Resiliency Leadership:
One Water Solutions on
California's Central Coast

**ONE
WATER**

April 26, 2017
8:30am - 11:40am
Location: Primrose B

SESSION FACILITATOR

JEFFERY SZYTEL
PE, MS, MBA

Founder & CEO
Water Systems Consulting, Inc.

One Water starts with a mindset that all water has value. As California water leaders, we are setting a precedent for delivering reliable and sustainable water solutions now and for generations to come. We have demonstrated we have the technology and approaches to not lose a drop! Yet, we are really just at the brink of watershed collaboration. We all have a continued and important role in overcoming existing barriers for sustainable water management. There is a demand for a new type of collaboration, communication, and engagement of stakeholders to create viable and lasting One Water solutions. That is why we are here today! Thank you for joining us in this important discussion.

PANEL MEMBERS

MIKE McCULLOUGH
MS, MPA

Government Affairs Administrator
Monterey Regional Water Pollution Control
Agency

JOE McDERMOTT
PE, MPA

Assistant/Interim General Manager
Ventura Water

CARRIE MATTINGLY

Director of Utilities
City of San Luis Obispo
